# Hose Reel with Fire Pump Cabinets

# Hose Reel with Fire Pump Cabinets

A fire pump and hose reel cabinet is a special arrangement designed to store and protect these firefighting devices. They are strategically located to provide easy access during emergency.

They safeguard the equipment from external elements such as rain, sandstorms, and UV radiation, preventing corrosion and deterioration. Additionally, enclosures protect against accidental damage caused by impact or tampering. Proper enclosures also reduce the risk of theft, ensuring that the equipment remains securely in place when not in use.

SFFECO Fire Pump & Hose Reel Cabinets are fabricated with the end user in mind. As we are aware that each client may have a unique requirement, we construct our systems to meet their demands while maintaining the ease of maintenance and durability. You can contact our sales team for assistance in determining the size of your pump and hose reel.

## Accessories and Specifications

- Hose Reel is Semi Rigid type
- Hose Reel length is 30mtr. (Other sizes are available on request)
- Fire Hose is double layered with red cover and black lining.
- Hose reel disks are manufactured with 1.2mm steel sheet.
