Pre-Packaged Pump House

Your ultimate solution for fire safety!

Pre-Packaged Pump House

Your ultimate solution for fire safety!

The high-quality construction and state-of-the-art design make the SFFECO Pre Packaged Pump House the ideal fire pump housing.

Designed with robust construction and meticulous engineering, this pump enclosure protects the fire pump and other components from external elements and damage.

As well as protecting, this unit also helps to organize the pump and components properly and makes them easier to access when needed.

All internal wiring and piping is done at the factory and external connectors are provided on the outer surface of the enclosure that enables easy piping and power connection at the field.

Complete fire pump set assembly is fixed inside a pump house enclosure with all fire pump related standard accessories, valves and fittings and pump testing instruments as required.

The pump house also can be provided with lighting, heat detectors, extinguishers, etc. as additional accessories upon customer request.

It is possible to make this unit in a variety of sizes and designs, depending on the needs of the customer. With a standard pump house, the following components can be included as customer requirements:

- Diesel Engine and Pump
- Electric Motor and Pump
- Jockey Pump
- Electric Fire Pump Controller
- Diesel Fire Pump Controller
- Jockey Pump Controller
- Complete Internal Wiring
- External Power Connection Terminal
- Interior Lights
- Emergency Light
- Battery
- Diesel Tank
- Stand Alone Heat Detector
- Gate Valve - Suction
- Non Return Valves
- Discharge Gate Valve
- Ball Valve
- Test Line
- ARV, CRV, & PRV, etc.
- Fabricated Steel Base Frames
- Mild Steel Structure and Skid
- Ventilation Fans
- Exhaust Pipe Line
- Suction Pipe Line
- Discharge Pipe Line
- Flow Meter
